OUTPUT

The screenshot shows the 'Web Tables Practice' application displaying a table of employee records. The browser address bar displays 'assertqa.com/practice/webtables'. The page features a dark blue header with navigation links: Home, Services, Why Us, Practice, Blog, and Contact Us. A 'Get Started' button is located in the top right corner. Below the header, a banner area contains the text 'Automation Practice' and a large heading 'Web Tables Practice'. Underneath the heading, a subheading reads 'Practice testing web tables with sorting, filtering, pagination, and various data assertions.' A central box titled 'What you can practice here' lists features: a free web table with 15 employee records, no sign-up or rate limits, and support for various testing tools and filters. At the bottom of the page, there is a search bar with the placeholder 'Search by name, email...' and two dropdown menus for 'All Depts' and 'All Status', along with a 'Reset' button. Below the search bar, the text 'Showing 10 of 15 results' is displayed. The table has 8 columns: ID, FIRST NAME, LAST NAME, EMAIL, AGE, SALARY, DEPT, and STATUS. The table contains 10 rows of data, with the first 9 rows visible. The 10th row is partially obscured by the bottom of the screenshot.

ID	FIRST NAME	LAST NAME	EMAIL	AGE	SALARY	DEPT	STATUS

 Testing Instructions

Test Scenarios:

- Assert table has correct number of rows
- Test column sorting (asc/desc)
- Verify search filtering works
- Test pagination navigation
- Assert cell values by row/column
- Verify status badge colors
- Test dropdown filters

🔥 Challenge:

The table has no data-cy attributes! Figure out how to locate and assert table elements on your own.

This table contains sample data for QA testing practice. All data is fictional.
