

Exercise 1 - Students can enter marks from 0 to 100							
TC ID	Test Scenario	Input Marks	Equivalence Class	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify system rejects negative mark values (Lower Invalid Class)	-1	Invalid: < 0	Error message / Reject input	P1	Marks < 0	Invalid
TC02	Verify system accepts minimum boundary mark value (Lower Boundary)	0	Valid: 0–100	Accept input	P2	Marks 0–100	Valid
TC03	Verify system accepts standard mid-range mark value (Nominal Class)	50	Valid: 0–100	Accept input	P3	Marks > 100	Invalid
TC04	Verify system accepts higher-than-average valid mark score	75	Valid: 0–100	Accept input			
TC05	Verify system accepts maximum boundary mark value (Upper Boundary)	100	Valid: 0–100	Accept input			
TC06	Verify system rejects mark values exceeding 100 (Upper Invalid Class)	101	Invalid: > 100	Error message / Reject input			
Exercise 2 - ATM Withdrawal Validation							
TC ID	Test Scenario	Input Amount	Equivalence Class	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify withdrawal transaction fails for amount below minimum limit	₹499	Invalid: < ₹500	Reject / Error	P1	Amount < ₹500	Invalid
TC02	Verify withdrawal transaction succeeds at exact minimum limit	₹500	Valid: ₹500–₹20,000	Accept	P2	₹500–₹20,000	Valid
TC03	Verify standard cash withdrawal for typical mid-range request	₹5,000	Valid: ₹500–₹20,000	Accept	P3	Amount > ₹20,000	Invalid
TC04	Verify mid-tier valid cash withdrawal request processing	₹10,000	Valid: ₹500–₹20,000	Accept			
TC05	Verify withdrawal transaction succeeds at exact daily maximum limit	₹20,000	Valid: ₹500–₹20,000	Accept			
TC06	Verify withdrawal transaction fails when exceeding daily maximum limit	₹20,001	Invalid: > ₹20,000	Reject / Error			
Exercise 3 - Username Validation							
TC ID	Test Scenario	Username Length	Example Input	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify account registration fails for username under 5 characters	4	abcd	Reject / Error	P1	Less than 5	Invalid
TC02	Verify account registration succeeds with exact minimum length string	5	abcde	Accept	P2	5 - 15	Valid
TC03	Verify standard account registration with nominal length username	10	abcdefghij	Accept	P3	More than 15	Invalid
TC04	Verify account registration succeeds with longer valid username	12	abcdefghijkl	Accept			
TC05	Verify account registration succeeds with exact maximum length string	15	abcdefghijklmno	Accept			
TC06	Verify account registration fails when username length exceeds 15 characters	16	abcdefghijklmnop	Reject / Error			
Exercise 4 - Mobile Number Validation							
TC ID	Test Scenario	Digit Length	Example Input	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify validation fails when mobile number has fewer than 10 digits	9	987654321	Reject / Error	P1	Less than 10 digits	Invalid
TC02	Verify validation passes with standard 10-digit mobile number	10	9876543210	Accept	P2	Exactly 10 digits	Valid
TC03	Verify validation passes with second valid 10-digit mobile number	10	9345262848	Accept	P3	More than 10 digits	Invalid
TC04	Verify validation passes with third valid 10-digit mobile number	10	8489246386	Accept			
TC05	Verify validation passes with fourth valid 10-digit mobile number	10	9123456789	Accept			
TC06	Verify validation fails when mobile number length exceeds 10 digits	11	98765432101	Reject / Error			

Exercise 5 - Shopping Cart Quantity							
TC ID	Test Scenario	Cart Quantity	Equivalence Class	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify adding to cart fails for zero or negative quantity selection	0	Invalid: < 1	Reject / Error	P1	Less than 1	Invalid
TC02	Verify cart allows purchasing a single minimum item quantity	1	Valid: 1 - 10	Accept	P2	1 - 10	Valid
TC03	Verify cart quantity updates correctly for typical purchase order	5	Valid: 1 - 10	Accept	P3	More than 10	Invalid
TC04	Verify cart quantity updates correctly for bulk purchase order	7	Valid: 1 - 10	Accept			
TC05	Verify cart permits purchasing exact maximum allowed item quantity	10	Valid: 1 - 10	Accept			
TC06	Verify purchase blocked when requested quantity exceeds item ceiling	11	Invalid: > 10	Reject / Error			
Exercise 6 - Bank Account Balance							
TC ID	Test Scenario	Equivalence Classes	Example Input	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify initial deposit rejected below minimum mandatory threshold	Amount < ₹1,000	₹100	Reject / Error	P1	Less than 1000	Invalid
TC02	Verify account setup succeeds at exact minimum mandatory balance floor	Amount = ₹1,000	₹1,000	Accept	P2	1000 - 1000000	Valid
TC03	Verify standard balance acceptance for regular savings account tier	Amount > ₹1,000	₹4,000	Accept	P3	More than 1000000	Invalid
TC04	Verify balance acceptance for high-value account balance tier	Amount < ₹10,00,000	₹7,000	Accept			
TC05	Verify account balance setup succeeds at maximum permitted ceiling	Amount = ₹10,00,000	₹10,00,000	Accept			
TC06	Verify deposit blocked when account balance exceeds maximum legal ceiling	Amount > ₹10,00,000	₹11,00,000	Reject / Error			
Exercise 7 - Employee Salary							
TC ID	Test Scenario	Equivalence Classes	Example Input	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify salary entry rejected below company wage structure floor	Amount < ₹15,000	₹10,000	Reject / Error	P1	Less than 15000	Invalid
TC02	Verify salary entry accepted at base minimum pay scale floor	Amount = ₹15,000	₹15,000	Accept	P2	15000 - 200000	Valid
TC03	Verify salary entry accepted for mid-level staff grade position	Amount > ₹15,000	₹30,000	Accept	P3	More than 200000	Invalid
TC04	Verify salary entry accepted for senior role compensation band	Amount < ₹2,00,000	₹1,00,000	Accept			
TC05	Verify salary entry accepted at exact maximum compensation ceiling	Amount = ₹2,00,000	₹2,00,000	Accept			
TC06	Verify salary entry rejected above maximum executive budget ceiling	Amount > ₹2,00,000	₹3,00,000	Reject / Error			
Exercise 8 - Movie Ticket Booking							
TC ID	Test Scenario	Ticket Count	Example Input	Expected Result	Partition	Range	Valid/Invalid
TC01	Verify booking system blocks transaction when selecting 0 tickets	Less than 1	0	Reject / Error	P1	Less than 1	Invalid
TC02	Verify ticket reservation succeeds for single seat selection	Ticket Count = 1	1	Accept	P2	1 - 6	Valid
TC03	Verify ticket reservation succeeds for small group seat selection	Ticket Count > 1	3	Accept	P3	More than 6	Invalid
TC04	Verify ticket reservation succeeds for medium group seat selection	Ticket Count < 6	4	Accept			
TC05	Verify ticket reservation succeeds at maximum transaction cap limit	Ticket Count = 6	6	Accept			
TC06	Verify ticket reservation fails when requesting seats above per-user cap	More than 6	7	Reject / Error
